

Acrylic Copolymer (Rheocare TTA)

We import and supply a quality range of Acrylic Copolymer manufactured by BASF under brand Rheocare. We offer our esteemed clients superior quality, high performance and accurate composition. Our product is a stable aqueous emulsion of acrylic Copolymer with enumerable applications.

Applications

- Viscosity modifier with use in Personal care and Home care industry.
- Suspending properties for aesthetic purposes.
- Perfect for transparent, high viscous formulations.
- High surfactant tolerance upto 30%

|------------------------|--|
| Chemical Name : | Milky aqueous emulsion of Acrylates Copolymer |
| Usage : | Used as viscosity modifier, suspending and aesthetic improver. |
| | |

Specifications

| | |
|---------------------------------|---|
| Chemical Nature | Milky aqueous emulsion of Acrylates Copolymer |
| Appearance | Milky emulsion |
| Active Matter % Min | 30 |
| pH | 2.0 (in 10% water sol) |
| Viscosity (1% in water at pH 7) | >7000 mPas |
| Packing | 200 Kgs HDPE drum |
