

Alkyl Polyglucosides (Agnique PG 8105)

We import and supply a quality range of Alkyl Polyglucosides manufactured by BASF under brand Agnique . We offer our esteemed clients superior quality, high performance and accurate composition. Our product is a non ionic, non toxic and biodegradable surfactant used in numerous applications.

Applications

- Excellent wetting and dispersant agent for pesticide formulations
- Stable emulsion formulations for liquid detergents & institutional cleaners
- Strong adjuvant properties with aqueous and oil based active ingredients in agro-formulations
- Outstanding foam stability in AFFF formulations in fire extinguisher formulations
- Compatible with ionic entities.
- Tolerant to high electrolyte environment

Chemical Name :	C8-C10 Alkyl Polyglucoside
Usage :	Used as Surfactant in Detergent, Agro, Fire safety equipments & various other industries.

Specifications

Chemical Nature	C8-C10 Alkyl Polyglucoside
Appearance	Slight yellow liquid
Active Matter % Min	62-65
pH	11.5 -12.5 (in 10% water sol)
Surface Tension (mN /m)	<25
HLB Value	14
Viscosity	500-1500 mPas
Packing	160 Kgs HDPE drum
