

Fatty Alcohol Ethoxylates (Lutensol XL series)

We import and supply a quality range of Fatty alcohol ethoxylates manufactured by BASF under brand Lutensol. We offer our esteemed clients superior quality, high performance and accurate composition. Our product is a non ionic, highly effective surfactant used in numerous applications.

Applications

- Viable substitute for Nonyl Phenol Ethoxylates.
- Strong cleaning and detergency for Home & Institutional Cleaners
- Compatible with cationic and anionic surfactants and other excipients for household Cleaners.
- Versatile to formulate acidic ,neutral as well as basic cleaning formulations for metal industry
- Unparallel performance even in presence of inorganic salts for liquid detergents
- Compatible with ionic entities.
- Tolerant to high electrolyte environment

Chemical Name :	C10 Guerbet Alcohol Ethoxylates (small amount of alkylene oxides present)
------------------------	---

Usage :	Used as Surfactant in Detergent, Cleaning, Wetting, Dispersing, Emulsification and other allied industries
----------------	--

Specifications

Chemical Nature	C10 Guerbet Alcohol Ethoxylates (small amount of alkylene oxides present)
Appearance	Clear liquid
Active Matter % Min	100%
pH	7.0 (in 10% water sol)
Surface Tension (mN/m)	<25
HLB Value	9-13 (depending on mole no.)
Packing	160 Kgs HDPE drum
