

## Polyacrylates ( Sokalan series)

We import and supply a quality range of Polyacrylates manufactured by BASF under brand Sokalan. We offer our esteemed clients superior quality, high performance and accurate composition. Our product is a high Molecular weight with versatile properties

### Applications

- Completely eliminates incrustation in laundry detergents
- Dispersing agent for sparingly soluble solids in aqueous mediums.
- Extremely effective in trapping hard water ions in water treatment for machinery cleaning.
- Compatible in Chlorine based disinfectants.
- Flocculating agent in metal extraction industry
- Effective as de-scalers in sugar industry

<b>Chemical Name :</b>	C10 Guerbet Alcohol Ethoxylates (small amount of alkylene oxides present)
------------------------	---

<b>Usage :</b>	Used as Surfactant in Detergent, Cleaning, Wetting, Dispersing, Emulsification and other allied industries
----------------	--

### Specifications

Chemical Nature	Polyacrylates
Appearance	Clear liquid to granules
Active Matter % Min	45-50
pH	4.0 (in 10% water sol)
Molar mass g/mol	>5000
Calcium dispersing capacity mg/g	>100
Packing	160 Kgs HDPE drum
